

PRATHEEP RAJ S

Automation Test Engineer

Bengaluru, Karnataka 560085 | 6379654491 | pratheep.te09@gmail.com

PROFESSIONAL SUMMARY

To aim at a profession that seeks challenging opportunities, and to update myself with advanced technical skills as per industry requirements. To work with a team of test engineers in producing quality software and to contribute towards the growth of the company.

PROFESSIONAL EXPERIENCE

- **1.2 years** of Professional Experience in Software Testing with a good understanding of the Software Testing Life Cycle.
- Presently serving as an Automation Test Engineer at **Pentachrome Technologies Pvt Ltd** since April 2025

TECHNICAL EXPERIENCE

- Extensive experience in navigating the **software testing life cycle (STLC)**, demonstrating expertise in functional, integration, and system testing.
- Proficient in transforming manual test cases into efficient automation test scripts utilizing **Playwright** with **JavaScript**.
- Adept at identifying and utilizing **locators** and **XPath** for precise web element identification.
- Contributing to designing a robust **hybrid framework**, using POM classes and fixtures.
- Played a pivotal role in incorporating web elements into the **Page Object Model (POM)** class, enhancing test script readability and maintenance in the framework.
- Proficiency in implementing **data-driven testing** methodologies involving various data sources such as Excel sheets and JSON files for enhanced test coverage.
- Applied various JavaScript concepts, including **promises**, **functions**, **strings**, and **arrays** handling within test scripts.
- Proficient in collaborating within **Agile/Scrum** development methodologies.
- Proficient in **API testing** utilizing **Postman**, demonstrating expertise in handling JSON, HTTP structures, CRUD operations, request chaining, and validation.

SKILLS

Frontend Automation Tool

- Playwright
- Selenium

Build & CI Tool

- Maven
- Jenkins

Backend Tools

- Postman

IDE

- Eclipse
- VS Code

Defect Tracking

- JIRA

Version Control

- GitHub

PROJECTS

Edible Arrangement:

Application: Web Application

Domain: Quick Commerce

Duration: 14 Months

Edible Arrangement is a franchise-based e-commerce web application used to manage the process of browsing, ordering, and delivering gift items such as fruit bouquets, flower bouquets, sweets, and occasion combos. The system connects customers, multiple franchise stores, and an admin panel in a single platform. It includes features like category-based shopping, store locator, cart and checkout, order processing, inventory management, same-day delivery, and reports.

Roles & Responsibilities:

Manual Testing:

- Understanding the requirement and preparing test scenarios and writing test cases.
- Implementing test case design technique while writing test cases.
- Executing test cases manually and converting those into test scripts.
- Performing Smoke Testing, Functional Testing, Integration Testing, System Testing, and Adhoc Testing.
- Raising the defects in JIRA and tracking the defects.
- Understanding the Swagger document.
- Tested different HTTP methods like GET, POST, PUT, PATCH, DELETE.
- Implemented environment variables and global variables.
- Validated JSON responses using JSON Path.

Automation Testing:

- Developed end-to-end UI automation test scripts using Playwright (JavaScript), covering critical user flows and regression scenarios.
- Designed a scalable test framework using Playwright's Page Object Model (POM) pattern for maintainable and reusable test code.
- Leveraged Playwright's parallel execution and built-in reporter to run cross-browser tests and generate HTML reports.
- Configured playwright.config.js for parallel execution and cross-browser testing.
- Implemented robust assertions using the expect method from Playwright's assertion library.
- Created POM classes to promote reusability and managed test data through JSON files.
- Generated HTML reports using the Playwright HTML reporter.
- Utilized JSONPath and response parsing techniques to extract and validate dynamic API responses.
- Participated in Agile/Scrum ceremonies; logged, tracked and managed defects using Jira.
- Pushed code to GitHub for continuous integration and test execution.

ACADEMIC QUALIFICATION

Bachelor of Engineering — Anna University, Tamil Nadu.

DECLARATION

I hereby declare that the details mentioned above are true and correct to the best of my knowledge and belief.
