

PRATHEEP RAJ S

Automation Test Engineer

Bengaluru, Karnataka 560085 | 6379654491 | pratheep.te09@gmail.com

PROFESSIONAL SUMMARY

Automation Test Engineer with hands-on experience in software testing and test automation. Currently working on the Mediaocean Prisma application in the AdTech domain, maintaining and enhancing the Java-Selenium automation framework. Experienced in Java, Selenium WebDriver, TestNG, POM, PageFactory, ReportPortal, Playwright with JavaScript, API testing, Git, Maven, Jenkins, and Agile/Scrum methodologies.

PROFESSIONAL EXPERIENCE

- Automation Test Engineer — TestYentra Software Solutions Pvt Ltd | August 2026 – Present
- Client: Mediaocean Application: Prisma Domain: AdTech
- Automation Test Engineer — Pentachrome Technologies Pvt Ltd | April 2025 – June 2026
- Application: Edible Arrangement Domain: Quick Commerce

TECHNICAL EXPERIENCE

- Maintaining and enhancing the Java-Selenium automation framework.
- Developing and maintaining automated test scripts using Java, Selenium WebDriver, and TestNG.
- Applying Page Object Model (POM) design pattern to build reusable and maintainable automation components.
- Using ReportPortal for centralized test execution reporting, analysing results, and investigating failed test cases.
- Executing automated tests, debugging automation failures, and updating scripts based on application changes.
- Improving framework stability, reusability, and maintainability.
- Using Git for source-code management and version control.
- Collaborating with QA and development teams to resolve automation-related issues.
- Applying STLC practices across functional, integration, and system testing.
- Transforming manual test cases into automation scripts using Playwright with JavaScript.
- Identifying and using locators and XPath for precise web element identification.
- Contributing to a hybrid framework using POM classes and fixtures.
- Implementing data-driven testing using Excel and JSON files.
- Applying JavaScript concepts including promises, functions, strings, and arrays.
- Performing API testing using Postman, including JSON validation, HTTP methods, CRUD operations, request chaining, and response validation.
- Working within Agile/Scrum methodologies.

SKILLS

Frontend Automation Tools: Playwright, Selenium

API Testing Tools: Postman

Defect Tracking: JIRA

Version Control: Git / GitHub, Bitbucket

Build & CI Tools: Maven, Jenkins

IDEs: Eclipse, IntelliJ, VS Code

Languages: Java, JavaScript

Test Framework / Reporting: TestNG, ReportPortal, Playwright HTML Reporter

PROJECTS

Mediaocean – Prisma Application

August 2026 – Present

Application: Web Application Domain: AdTech Client: Mediaocean

Mediaocean Prisma is a media management platform used by advertising agencies to plan, manage, execute, and track media campaigns and advertising operations.

Roles & Responsibilities:

- Maintaining and enhancing the Java-Selenium automation framework.
- Developing and maintaining automated test scripts using Java, Selenium WebDriver, and TestNG.
- Applying POM and PageFactory for reusable automation components.
- Executing automated test cases and analyzing test failures.
- Using ReportPortal to review centralized test execution results and investigate failed tests.
- Debugging automation failures and updating scripts based on application changes.
- Using Git for source-code management and version control.

Edible Arrangement:

April 2025 – June 2026 (14 Months) | Client: Pentachrome Technologies

Application: Web Application Domain: Quick Commerce

Edible Arrangement is a franchise-based e-commerce web application used to manage browsing, ordering, and delivering gift items such as fruit bouquets, flower bouquets, sweets, and occasion combos. The system connects customers, multiple franchise stores, and an admin panel in a single platform.

Manual Testing:

- Understanding requirements, preparing test scenarios, and writing test cases.
- Executing test cases manually and converting them into test scripts.
- Performing Smoke, Functional, Integration, System, and Adhoc Testing.
- Raising and tracking defects in JIRA.
- Understanding Swagger documentation.
- Testing HTTP methods: GET, POST, PUT, PATCH, DELETE.
- Implementing environment and global variables.
- Validating JSON responses using JSONPath.

Automation Testing:

- Developed end-to-end UI automation scripts using Playwright (JavaScript) for critical user flows and regression scenarios.
- Designed a scalable Playwright framework using the Page Object Model (POM) pattern.
- Used parallel execution and cross-browser testing with HTML reporting.
- Configured playwright.config.js for parallel execution and cross-browser testing.
- Implemented robust assertions using Playwright's expect method.
- Created reusable POM classes and managed test data through JSON files.
- Used JSONPath and response parsing to validate dynamic API responses.
- Participated in Agile/Scrum ceremonies and managed defects using JIRA.
- Pushed code to GitHub for continuous integration and test execution.

ACADEMIC QUALIFICATION

Bachelor of Engineering — Anna University, Tamil Nadu.

DECLARATION

I hereby declare that the details mentioned above are true and correct to the best of my knowledge and belief.
